

12/15/05 CHMM Board Meeting Notes

On the call where Karol Sole, Mark Kamiya, Bill Gamlin, Fred Moskowitz, Steve Sawyer, Hank Martin, Ed Glod, and Bob Wachsmuth.

The first topic of discussion was the Overview Course. We had 31 students that attended the course. The room venue was full. We had people from out of state, IIT grad students and one person from City of Gary Department of the Environment.

The next topic was the Chapter Elections. According to the results all of the officers were retained for 2006.

The December meeting was pretty good. It was good to mingle with the other organizations represented. Only about half the people signed up showed up to the meeting because of the weather. People liked the venue chosen. There was plenty of food. The speaker showed up at about 8:30 p.m. He rushed his presentation. We will probably try to participate in this next year again.

We talked a little about the request from George Nassos about charging a management for the overview course. If you have any additional comments please give them to Bill Gamlin.

Meeting topics and venues for 2006 were again discussed. Right now the tentative schedule is Rod Stipe/Weaver Boos for February a land application treatment process for waste waters-open venue, Jonathan Patlak/ENSR-site assessment presentation, and June/Steve Laughlin/Topic? Presentation. The thought is to try a breakfast meeting venue with June presenting the best potential for that. This schedule was discussed. We should finalize it in our next conference call. It was mentioned that the Holiday Inn in Willowbrook might be a good meeting venue. Other meeting topics might be ILEPA Community Right to Know Regulations and the USEPA underground guidance (Dr. Barbara Carr 312-886-7187).

Ed Glod mentioned that there is a new spot for e-mail addresses on the web page. It was also mentioned that anyone has any job openings that we should send them to Bill and Ed. Any seminar info should also be sent to be put onto the web page.

Next conference call tentatively schedule for 1/10/06.
